Regional Center for Renewable Energy and Energy Efficiency

المركز الإقليمي للطاقة المتجددة وكفاءة الطاقة
Who we are?

The Regional Center for Renewable Energy and Energy Efficiency (RCREEE) is an intergovernmental organization with diplomatic status that aims to enable and increase the adoption of renewable energy and energy efficiency practices across the Arab countries. RCREEE is the official technical arm of both League of Arab State – Energy Department and Arab Ministerial Council for Electricity (AMCE).

RCREEE teams-up with governments, international organizations, IFIs and private sector via several partnerships forms to initiate and lead clean energy policy dialogues, strategies, technologies, capacity development and renewable energy investment platforms in order to increase Arab states’ share of tomorrow’s modern energy solutions.

Our Vision and Mission: We, the Regional Center for Renewable Energy and Energy Efficiency, are the strategic partner for Arab countries in driving energy transition contributing to a better life for all our people 🌍

RCREEE was set up based on Cairo Declaration which was signed in June 2008 by government representatives from Arab countries. Having today 17 Arab countries among its members, RCREEE strives to lead renewable energy and energy efficiency initiatives and expertise in all Arab states.
Who we are?

The Charta stipulates a three-tier structure with a Member States’ assembly ("Board of Trustees"), an executive committee ("Executive Committee") and a secretariat ("Secretariat") that is headed by the RCREEE Executive Director.

RCREEE Secretariat is a unique mix of multidisciplinary teams across Sustainable Energy and Climate Action sub-sectors with multicultural (Arab and International) backgrounds.
Sustainable Energy Policies and Technical Support
RCREEE strives to provide technical support to its member states, regional and international institutions. RCREEE’s main contribution areas are through tailoring sustainable energy strategies, designing national renewable energy and energy efficiency plans, building institutional capacities and effectiveness through technical and regulatory recommendations. RCREEE’s team also supports designing and implementing regulatory sustainable energy frameworks and standards.

Energy Market Research and Knowledge Management
Through its wide range of projects, RCREEE provides the most accurate and transparent renewable energy and energy efficiency information for the Arab region relying upon consistent methodologies and strong partnerships with local governments and regional and international institutions.

Renewable Energy & Energy Efficiency Private Sector Promotion
To advance sustainable development in the region, RCREEE cooperates with national & regional organizations for the removal of operational or regulatory challenges. Thus, RCREEE can support increasing the volume of private sector investment and engagement in sustainable energy sectors. RCREEE also encourages private-public cooperation and partnerships.

Green & Climate Finance
Through its strong ties with international financing institutions, RCREEE offers pioneering and unique financing mechanisms to its member states. Besides, RCREEE tailors new cooperation modules to increase the region’s attractiveness to potential funders while considering the region’s sustainable energy market characteristics and the needs of each member state.
Knowledge Exchange and Capacity & Human Development

RCREEE designs and launches capacity-building programs for sustainable energy professionals and experts showcasing the latest relevant technologies, technical and regulatory updates. Additionally, RCREEE engages younger talents across the Arab region in a hands-on experience and actively engages in gender inclusion initiatives to enable women in sustainable energy fields.

Certification & Standardization Services

RCREEE strives to introduce regional standards and certification schemes for sustainable energy products and human capital. These projects serve as tools to enable RCREEE member states to implement its national sustainable energy plans while adopting unified regional standards and schemes.

Environmental & Socio-Economic Analysis & Support

To maximize the socio-economic benefits of sustainable development, RCREEE adopts a number of programs to ensure the region’s energy transition towards sustainable resources while mitigating climate change impacts. RCREEE also implements innovative initiatives for environment preservation.

For more details about the RCREEE's projects
Building strong partnerships with regional and international organizations and gaining their trust is one of our main success factors. RCREEE teams-up with governments, international organizations, IFIs and Private Sector via several forms of partnerships to initiate and lead clean energy policy dialogues, strategies, and technologies.
